[[image - black and white photograph of a woman's partial face with her hand on her cheek]]

Anybody can promise younger-looking skin.

But feeling is believing.

There's more to young-looking skin than just the way it looks. The real proof is the way it feels.

And with 'Moon Drops' Moisture Film, your skin will actually feel younger. More supple. More alive.

You see, every 28 days your surface skin replaces itself. 'Moon Drops', with Cellular Moisturizing, is absorbed into the stratum corneum to feed moisture to the dry cells which rise to the surface. Which means your 'new' skin not only looks younger, it feels younger.

One thing more. Revlon wants every woman to feel the 'Moon Drops' difference for herself, so we put our know-how to work to make it affordable for almost everyone.

'Moon Drops' Moisture Film. Younger looking skin is our promise. But don't just believe what you see. Believe what you feel.

'Moon Drops' Moisture Film  
Luxury skincare made affordable by Revlon.

## Smithsonian Institution

*National Museum of African American History and Culture*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
