This morning after breakfast I went down in the fields. Near the river a Phoebe was flycatching along a fence. It flew along in front for a ways and finally I shot it.

Near Seeley's March I flushed a bunch of nearly grown Quail. They came up with a great racket and I dropped one. There were a number of Bobolinks in the marsh and Song Sparrow were scattered all through a

weedy field.

Tonight about 10:45 I heard several Black-billed Cuckoos flying over.  
they gave the characteristic Cluck-uk.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
