Aug. 5, Friday.

331. *Dryobates villosus*. A. Wetmore, Hawk Creek, North Freedom, Wis, iris brown. bill black base of mandible lighter, tarsus dark slaty blue. Length 8 7/8 wing 4 3/4 tail 2 3/4 [[male symbol]] im. stomach contents. insects.

This morning after breakfast I went over to the Millpond and then up Hawk Creek. Chimney Swifts were common until the woods were entered. They were seen either high up or low down indifferently.

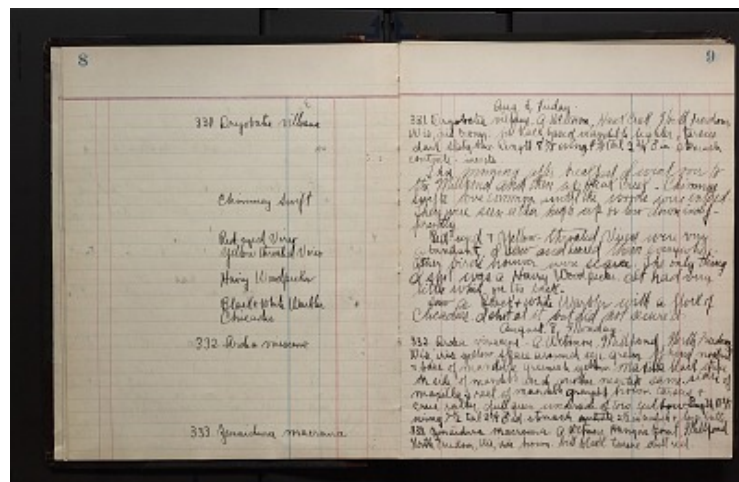

Red-eyed & Yellow-throated Vireos were very abundant. I saw and heard them everywhere. Other birds however were scarce. The only thing I shot was a Hairy Woodpecker. It had very little white on the back.

Saw a Black & White Warbler with a flock of Chicadees. I shot at it but did not secure it.

August. 8, Monday.

332. *Ardea virescens*. A. Wetmore, Millpond, North Freedom, Wis, iris yellow. space around eye green. behind nostril & base of mandible greenish yellow. Maxilla black. stripe on side of mandible and another near tip same. sides of maxilla & rest of mandible grayish brown. tarsus & crus rather dull green. underside of toes yellow. Length 18 3/8 wing 7 1/2 tail 2 3/8 [[male symbol]] ad. stomach contents 2 1/2 in. sunfish & large beetle

333. *Zenaidura macroura*. A. Wetmore, Hanger's Point, Millpond North Freedom, Wis, iris brown. bill black. tarsus dull red.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
