This afternoon, on Puhincha, in the humid paramo zone, in a hedge along a road side (i.e. in vegetation which may really be characteristic of the upper humid temperate zone) I came across a small group of at least 3 birds of new species of *Chlorospingus* or *Atlapetes* or something very similar.

Moving about quite like the "*Chlorospingus*" I saw yesterday also relatively silent; although one of the birds probably uttered a few soft, rather buzzy, single "Dzuht" Notes as it moved through the bushes (it

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
