embodying the latest in modern technological practices can be successfully set up in Korea. What is lacking at present is the indigenous capability to do more than copy - to adapt techniques and develop healthy industries that can grow and compete in world markets.

C. Korean Science and Technology Today

The group was impressed by the quality of many Korean scientists and the possibility of further technical progress. The group also visited certain laboratories which are well organized and well operated.

It was apparent that no existing institution or combination of institutions could serve the purpose envisaged. However, we did find two laboratories which could serve as a nucleus around which to build.

Science and technology activities within the Government are carried on by a variety of ministries and agencies including the Ministries of Home Affairs, Finance, Education, Agriculture-Forestry, Commerce and Industry, National Defense, Construction, Transportation, Communications, and Public Health, and the Office of Atomic Energy. There are a

## Smithsonian Institution

*Smithsonian Institution Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
